## 50 Years Of Feeling Good

(NAPSA)—Anyone who loves to get into hot water will be in a whirl about the 50th anniversary of the Jacuzzi® hydrotherapy pump. The invention created an industry for outdoor, portable, above ground hot tubs. Although the benefits of hydrotherapy have a long history, what opened the floodgate for moving water were the Jacuzzi brothers.

**Jacuzzi, the hot tub company that started an industry, celebrates the anniversary of its hydrotherapy pump.**

It began in the early 1900s, when the seven brothers emigrated to the U.S. In 1956, the brothers responded to a family member's need for pain-relieving hydrotherapy, and the portable hydrotherapy pump was created. That pump would turn any normal bathtub into a relaxing and rejuvenating hydrotherapeutic spa and Jacuzzi became a household name.

The key to their success was the incorporation of innovative therapy jets into the sides of the first hot tub. These patented jets produced a 50/50 air to water ratio, providing an experience like none before.

Today, celebrating the 50th anniversary, Jacuzzi has become one of the world's most recognized and largest-selling brands of outdoor hot tubs.
