## A View Toward Beauty

(NAPS)—Science, it seems, has good news for homemakers. It's now possible to own beautiful, stylish windows high in insulating value and low in maintenance costs. Possible only if the windows are made of vinyl.

**Whether your decorating style is high tech or highly traditional, an energy-efficient vinyl window can provide a nice reflection on your good sense and good taste.**

Today's vinyl windows come in multiple styles and colors to match just about any decorating style and taste. They never need painting, staining, or sanding and can be easily cleaned with soap and water.

Some high quality windows, like the Quantum2, come with a lifetime product warranty, a glass breakage warranty, and a 40 percent fuel savings pledge that guarantees to save you 40 percent on your annual fuel consumption.

To learn more, call 877-3Quantum or see *www.quantum2.net* on line.
