

America's Top Doctors

(NAPSA)—New research has led to breakthroughs in cancer treatments—and America has some of the world's top cancer doctors.

AMERICA'S TOP DOCTORS FOR CANCER

The trusted source for healthcare choices

A CASTLE CONNOLLY GUIDE

Yet cancer is still considered the number-one killer of Americans 85 and younger. In fact, hundreds of thousands of people will be diagnosed with cancer this year alone. Fortunately, many of them may find help in a new book. Called "America's Top Doctors for Cancer" (Castle Connolly Medical Ltd., \$29.95), the book is a first-of-its-kind guide meant to help consumers find the top physicians for the diagnosis and treatment of cancer. Castle Connolly's physician-led research team selected doctors representing more than 40 specialties based on comprehensive surveys of physicians and medical leaders across the country.

The book features detailed profiles of more than 2,000 doctors, as well as information on leading medical centers and specialty hospitals. It also includes information that can help patients locate clinical trials.
