

An Antidote To Post-Super Bowl Blues

(NAPSA)—Each year, many Americans experience “Heart-break Monday,” the start of the workweek following the Super Bowl when reality sets in: The football season is over.

Dr. Angelos Halaris, the medical director of adult psychiatry at Loyola University Medical Center, explains: “When a person engages in a pleasurable activity, such as watching a football game, a neurotransmitter [brain chemical] called dopamine is released in a part of the brain called the nucleus accumbens. When the pleasurable activity ends, the person is left with a feeling of deprivation.”*

It may ease the sting to remember that Valentine’s Day is just a few days away. Consider these tips to “Wow Her” this Valentine’s Day (and remember, a new season of football is only a few months away).
