“B” Free Of Mouth Pain

(NAPSA)—There’s now a pleasant, natural way to relieve temporary pain from mouth sores, cuts, wounds and mouth ulcers and to support a healthy mouth lining.

It’s done with a dose of bioactive B12 (methylcobalamin) and hyaluronan in the form of a little disc you let dissolve in your mouth.

You simply place the H-B12 Melts[®] disc near (not on) where the pain is—mouth tissues are delicate, so you don’t want to stick the disc right on the sore where it can disrupt the healing.

H-B12 Melts discs dissolve in your mouth to provide temporary relief from mouth sores.

The disc coats and soothes while it dissolves and supports natural healing. It works with braces and dentures and releases bioactive B12 for absorption by mouth cells.

Called H-B12 Melts, the oral adhering discs are available at CVS pharmacies or by calling (877) 672-6541.
