Breathe New Life Into Your Old PC For Free

(NAPSA)—If your PC is slow when you run games, applications and your browser, there's good news. You can easily breathe new life into your old PC for free, and avoid spending hundreds of dollars on a new one.

Baidu PC Faster is designed to clean up your computer, manage updates and boost your Internet speed with a single click of a mouse.

Make your old computer run like new.

Clear Cache and Junk Files

Over time, a computer gets filled with things that can slow it down. Whenever you use your computer, little bits of code accumulate and take up disk space. Baidu PC Faster cleans it all instantly.

Optimize Your Start-up Items

Every time your computer starts up, it has a long list of things to do, like turn on your Internet connection, open system services and get your computer ready to work.

With Baidu PC Faster, it's easy to clear out unnecessary start-up items and save minutes each time you boot up.

Tune Up Your Web Browser

Everyone needs fast Internet! With an optimization tool like Baidu PC Faster, you can clean out the clutter and adware your computer doesn't need, and browse the Web as quickly as you did when your PC was new.
