

HINTS FOR HOMEOWNERS

Carefree Pool Maintenance

(NAPSA)—Homeowners now have easier ways to clean up when it comes to their pools.

A new generation of pool cleaners has taken all the best features from older designs produced over the past 25 years to create the ultimate model.

New pool cleaners pick up even more debris, making maintenance easier.

The new generation Kreepy Krauly® features a turbo-action swivel design and a new regulator valve for more vacuuming and cleaning power. The cleaner now picks up even larger debris as a result of its widened intake and modified design of the Flapper—the part that is responsible for dividing the water flow to automatically propel the cleaner.

This pool cleaner can be self-installed in minutes without tools. There are two models, one for gunite/concrete pools and one for vinyl, tile and fiberglass pools. They are available through pool builders, service companies and at pool stores.

For a free brochure or additional information, write to Pentair Pool Products, 1620 Hawkins Ave., Sanford, NC 27330, call 1-800-374-4700 or visit www.pentairpool.com.
