Fast Relief For Dry, Cracked, Itchy Feet

(NAPSA)—According to the American Podiatric Medical Association, the average American takes approximately 8,000 to 10,000 steps a day. Most of these men and women will experience some sort of problem with their feet, including dry, cracked skin, in their lifetime.

A unique, therapeutic cream has been developed that aids in skin cell rejuvenation and makes feet look and feel great.

Miracle Foot Repair[®] Cream, which contains 60 percent of the purest aloe certified by the International Aloe Science Council, repairs dry, cracked and itchy feet. In addition, the cream includes menthol and peppermint oil to help combat unwanted foot odors and revitalize tired, achy feet.

“It is important for individuals to take good care of their feet year round,” said Jason Biziak, product manager, OnTel Products Corporation. “The quality of ingredients contained in Miracle Foot Repair[®] Cream makes taking care of your feet just a little bit easier.”

Look for Miracle Foot Repair[®] Cream at top drug retailers or you can visit them online at www.miraclefootrepaircream.com.
