
YOUR GARDEN

Create A "Magical" Garden

(NAPSA)—Transform your garden with a minimum of effort by combining remnants of bygone days and some new plantings. These tips from professional gardeners will help get you started.

- For a nostalgic touch, use antique and weathered planters. Secure them to rough patio surfaces with VELCRO® brand Extreme hook and loop fasteners for protection from high winds and rain.

- For drama, add ornamental grasses. Group tall grasses to form a hedge; mingle smaller ones with flowering perennials.

- Create cool outdoor rooms, by planting fast-growing shade trees around decks and patios. Protect the tree base with self-gripping VELCRO® brand Tree Wrap.

- Camouflage shed walls and trellises with flowering vines. Keep adjustable VELCRO® brand Plant Ties on hand for securing vines and staking vegetables and flowers. Use Tree Ties for staking saplings.

- Shed light on a garden path, gazebo or porch with lanterns and boxed sconces. No nails or screws required to secure them to cement and brick paths and affix them to rough walls using VELCRO® brand Extreme fasteners.
