## **Do You Believe In Magic?**

(NAPSA)—Many wizards-in-training have fallen under the spell of a new game.

Mastering the new game, known as Casting Stones, is a playful way to bring the fun and excitement of spell casting to Harry Potter fans.

**The quest for the most powerful stones can be a fun and exciting challenge.**

Each Casting Stone features a powerful icon from the magical world of Harry Potter on one side and a number representing the stone's power on the other side.

The fun lies in learning exactly how to use the newly found magic and collecting all of the Casting Stones to become the most powerful wizard.

The stones can be found in booster packs, so kids can collect the entire set, including the Chaser Stones, the most rare and powerful stones of all.

Kids can check out [www.matelgames.com/harrypotter](http://www.matelgames.com/harrypotter) to find out about the latest Casting Stones news and updates. They can download gameplay rules, background information and a checklist to make collecting easier.
