

Car Care Corner

Environmental Efforts

(NAPSA)—Car owners go green if they heed these hints:

- **Don't speed.** Gas mileage decreases sharply above 60 mph.

- **Drive gently.** Avoid sudden accelerations and jerky stop-and-go's. Use cruise control on open highways to keep your speed as steady as possible.

- **Avoid idling.**

- **Remove excess items.** Less weight means better mileage.

- **Remove rooftop cargo carriers** after vacations.

WE EMPLOY

CERTIFIED PROFESSIONALS

Let us show you their credentials

Shops with certified technicians display the ASE sign.

- **Consolidate** your errands to eliminate unnecessary driving.

- **Keep your engine tuned.** A misfiring spark plug will reduce fuel efficiency. Replace filters and fluids as recommended in your owner's manual.

- **Check your tires** for proper inflation. Underinflation wastes fuel by making your engine work harder to push the vehicle.

- **Look for qualified auto technicians** as evidenced by trade school diplomas, certifications by the National Institute for Automotive Service Excellence and signs of advanced course work.
