

POINTERS ON POOLS

Equipping Your New Pool

(NAPSA)—Building a pool can be an exciting way to help your family enjoy some healthy fun and relaxation. In addition, according to the industry, there has never been a better time to build that dream pool with the tremendous innovations in energy and money-saving equipment now available.

A new booklet, *Equipping Your New Pool*, can help homeowners make informed decisions.

Before building your pool, experts advise obtaining free booklets such as *Equipping Your New Pool*, from Pentair Pool Products™. It offers the following tips:

- **Light Up The Night**—Lighting systems, which can dramatically create a mood and enhance your nighttime pool environment, have made significant advances. For example, the Spectrum Amerlite® (SAm™) is the world's first underwater light that changes color continuously or locks on a single color with the flip of a switch.

- **Clean Up Your Act**—New generation automatic pool cleaners, such as the Kreepy Krauly®, help keep pools clean, with minimum effort. It automatically operates when a pool's pump runs, using the pool's existing filtration system.

- **Take Control**—Control systems, such as Compool™, fully automate the operation of up to seven functions, such as pool/spa pumps, filters, heaters, waterfalls, fountains and synchronized lighting.

- **Kill The Chill**—New, high efficiency heat pumps, such as the MiniMax® Plus HP, save energy while maximizing heat. In addition, environmentally-safe, high-performance refrigerants are now used in such heat pumps.
