

HINTS FOR HOMEOWNERS

Fence Facts

(NAPSA)—Homeowners can protect their privacy and the environment at the same time with fences made from 100 percent recycled plastic and wood fiber rerouted from landfills and made into a durable product that looks and feels like real wood.

Homeowners can enjoy the beauty and privacy of real wood fencing without the yearly maintenance.

Not only is the material highly attractive—with a rough-sawn texture and deep embossing, for the look of a cedar or redwood fence—it's also low maintenance. It won't rot, split or attract insects, and it doesn't fade to gray so it never needs painting, yet it costs no more than vinyl fencing.

TimberWolf® Wood Composite Fencing Products and Systems from FiberTech Polymers, Inc., are available in select Lowe's Home Improvement stores nationwide and are part of Lowe's Guaranteed Installation Program, so homeowners can complete the installation themselves or work with a professional.

To learn about the complete line of wood composite products from FiberTech Polymers, Inc., including fencing, edging and shims, visit www.TimberWolfComposites.com or call (888) 24T-Wolf.
