

GIFT IDEAS

For A “Safe” Gift Idea, Think Inside The Box

(NAPSA)—For the person who has everything and needs to protect it, consider the gift of a fire-safe, waterproof security chest.

With identity theft, in-home and weather-related disasters occurring more often, consumers are more aware than ever that many important electronic and hard-copy documents are at risk and cannot be restored or would be too costly or troublesome to replace. You can give peace of mind with a unique, yet practical gift that can be enjoyed year-round.

The National Fire Protection Association reports that a fire department responds to a fire somewhere in the United States every 20 seconds. Safeguarding valuables, media and important documents should be a priority.

Consider centralizing and safeguarding birth certificates, Social Security cards, credit cards and other personal documents to make an insurance claim, obtain credit or secure a job when a disaster hits.

Additional important items to safely store include:

- Itemized home-inventory list
- Wills
- Financial bank, income and tax statements
- Stocks and bond certificates
- Credit cards
- Health, dental and medical records
- Graduation diploma
- School transcripts
- Vehicle registration, title and certificate of sale

The compact size and reasonable price of a fire-safe waterproof security chest makes it a popular gift option.

- Marriage certificate
- Irreplaceable photos and memories (hard copy and digital)
- New home deed
- Mortgage paperwork
- Passport
- Investment paperwork
- Citizenship documents
- CDs, DVDs, USB Ports, Flash Drives, Hard Drives
- Family Heirlooms
- Jewelry.

The world's leading supplier of fire-resistant and security storage containers, Sentry Group, offers many sizes and varieties, including fire-resistant and waterproof or water-resistant protection. Many carry either a UL or ETL classification for fire endurance, meaning that the interior of the unit and its contents are guarded from heat during a typical fire for a specified time.

Many models protect sensitive electronic media from fire.
