

Do It Yourself

Four Winter Home Projects

(NAPSA)—Winter is in full swing! The cold weather is not ideal for working on outside home maintenance projects, so focus on sprucing things up indoors. These four winter tune-ups will give your home a pick-me-up just in time for spring.

Revamp the Doors

Looking for an inexpensive way to update your home? Give the doors in your home a makeover! Source unique doorknobs from an antique or hardware store, then paint your doors a different color to give your home a whole new look!

Lubricate the exhaust fan above the kitchen stove with WD-40 EZ-REACH.

Paint a Room

Freshen up the look of your walls and cabinets. Winter is the perfect time to paint your walls because the dry winter air will help your paint set more quickly than in the humidity of summer. Be sure to crack a window or have proper ventilation.

Lubricate Squeaky Moving Parts

Lubricating moving parts prevents them from wearing out. Easily lubricate moving parts, such as kitchen cabinets or door hinges, wheels on a dishwasher rack, and the exhaust fan over the stove with WD-40 EZ-REACH™. It has an 8-inch flexible straw that bends and keeps its shape to get WD-40® Multi-Use Product into hard-to-reach places.

Replace Furnace Filters and Clean Vents

Air filters in your furnace should be replaced once every three months to keep it working properly. Reference the instructions on your HVAC system to help you through the process. Winter is also a good time to vacuum your dryer and kitchen vents to remove lint and grease buildup.

With these four tips, take advantage of the time spent in the warm indoors and spruce up your home to have it in tip-top shape for spring.
