Get Your Toes Ready

(NAPSA)—If you want terrific toenails to make the most of your favorite sandals, it's time to treat yourself to a pedicure.

Some women prefer to give themselves a pedicure. That's because they don't want anyone to see their embarrassing, thick, ugly, discolored toenails, which could be a sign of a nail fungus, a common foot health problem.

Are your feet sandal ready? If not, you may want to explore pre-decorated, plastic toenails that are easy to apply.

There is a solution for anyone who wants more attractive toes—a Fashion ToeNail Accents Kit from Kiss.

The thin, pre-decorated plastic toenails last up to 10 days and, because they are so flexible and short, they look very real and feel very natural. They have a self-tab for easy application and come in Hot Pink, French Manicure and French Manicure with Flowers.

For those with damaged or missing natural toenails, there's medical-grade nail glue, a safe hypoallergenic formula. For more information, visit www.kissusa.com.
