

## Give Morning Rush The Brush Off

**(NAPSA)—If knowing your youngsters have taken proper care of their teeth every day gives you something to smile about, consider these statistics: Research shows that 5-year-olds clean barely 25 percent of their tooth surfaces when brushing. Even 11-year-olds hit an average of only 50 percent, despite parental prodding. That's where the 60 Second Time Machine toothbrush can help. Its unique, patented 360-degree brush heads, colorful see-through handle, blinking lights and built-in timer make kids actually want to brush. This 60 Second Time Machine toothbrush can make a difference in brushing success and attitude towards brushing. That can help kids make the grade in the dentist's chair, too. This special toothbrush from KidGenics is available at Target, Wal-Mart and other stores or at [www.timemachinetoothbrush.com](http://www.timemachinetoothbrush.com).**
