

INGENIOUS IDEAS DEPARTMENT

Handy Helper

(NASPA)—Need a hand with hard-to-reach items? A clever device can help you retrieve anything up high, down low or out of reach, for greater independence and ease of living.

Save time, strain and trouble with a unique reaching tool.

Something as small as a pill or as large as a book can be picked up with a lightweight and easy-to-use tool that's helpful for anyone who's wheelchair-bound, on crutches, or unable to use a step stool. It can be used to:

- Reach behind the washer to pick up a missing sock, or pick up the remote control.
- Retrieve items on high shelves or reach under the sink.
- Sort laundry.
- Open cabinets, drawers and doors.
- Pick up soap, washcloth or shampoo in the shower; remove debris from pond, pool, spa or fountain.

Built to last, this EZ Assist Reacher comes in three different lengths. To learn more, call (800) 748-5529; or visit www.arcoa.com.
