

Holiday Dining

Healthy, Tasty Desserts

(NAPSA)—While holiday memories often center on family meals, including special, traditional desserts, many families may be concerned about the extra calories—but there are some smart and simple ways for families to overcome this challenge.

To preserve your traditions and help your family's waistline, you may want to consider making some swaps that will still satisfy your family's sweet tooth but offer more nutrients and fewer calories, less saturated and *trans* fats and added sugar.

As you plan your holiday get-togethers, consider these tasty dessert ideas:

- **Pile on the fruit.** Fruit by itself makes an excellent dessert. Try placing a bowl of clementines or apples on the holiday table. The fruit looks beautiful and is easy to eat, even for children. Offer a fruit basket to friends instead of a plate of holiday cookies. Make a winter fruit salad with your traditional meal.

- **Update family favorites with healthy add-ins.** If home-made breads are your family's treat of choice, try baking with whole wheat flour or adding in healthful options such as bananas, blueberries, cranberries, apples, walnuts and pecans. Just be sure to use nuts in moderation since they are high in calories. Try the healthy Banana Nut Bread recipe from the National Heart, Lung, and Blood Institute at

This holiday season, you can enjoy traditional treats—with a more healthful twist.

- **Make it a mini.** You may have noticed that food portions have grown quite a bit over the past few decades. Fortunately, you don't need to eat a large dessert to enjoy it. Consider serving bite-sized desserts instead of full servings. Mini pies, cake pops and one-bite cookies are all ways you can control your family's portion sizes. Just remember, just because they are smaller in size doesn't mean you should eat more of them.
