How To Reduce Fine Lines

(NAPSA)—The latest technology in skin care products can do more than improve the overall appearance of your skin—some ingredients may actually help prevent the formation of fine lines and wrinkles.

New moisturizing creams can help diminish fine lines immediately while improving skin's appearance and moisture level over time. For example, new Tri-Aktiline Total Face Instant Wrin-

The latest moisturizers fight wrinkles immediately and over the long term.

kle Reducing Moisturizer from GoodSkin Labs, available at Kohl's department stores, has been shown in clinical trials to help immediately reduce the appearance of dry skin and fine lines.

Immediately, key ingredient Kombuchka PH Extract, derived from sweet black tea, plumps wrinkles while Gatuline Expression works to relax the appearance of fine lines. Another ingredient, Argireline, helps prompt skin into its rebuild mode, boosting natural collagen production for long-term, visible fine line and wrinkle reduction.

Finally, Phytomatrix 100, derived from the soybean, rebuilds natural collagen and helps counteract the visible effects of premature biological and UV-induced aging for smoother, firmer skin. The moisturizer spreads easily over the whole face for a more refreshed, moisturized and younger look.
