

Understanding Our Economy

Improving Air Quality While Protecting U.S. Jobs

(NAPSA)—One of the most important things people can do to stimulate the national economy—and save jobs here at home—is to buy products that are made in the U.S.A. And if you're a fan of buying American, a great place to start is with...fans.

For example, over 80 percent of Broan-NuTone ventilation products sold in the U.S. are designed, engineered and manufactured in the United States with U.S. and foreign parts. This means families can ensure better indoor air quality (IAQ) for their homes while protecting American jobs.

Indoor air quality

Today's better-insulated homes may keep the weather outside but they also keep contaminants inside. According to the Environmental Protection Agency, the air indoors—where we spend as much as 90 percent of our time—can be more hazardous to your health than heavy smog.

Numerous sources contribute to poor IAQ, and their cumulative effects can create a toxic environment that can aggravate allergies and lead to chronic respiratory diseases. Your first line of defense is to keep your house clean and well ventilated. One way to protect your home from mold, airborne contaminants and volatile organic compounds is to install ENERGY STAR qualified ventilation fans.

Surprisingly quiet and easy to install, Broan-NuTone ventilation

Domestically made ventilation fans help ensure good indoor air quality while preserving American jobs.

fans are available in a variety of power levels and models. With options such as lights, night lights, heaters, customizable humidity sensors, decorative designs and recessed fan/light combos, they have plenty of possibilities to meet your ventilation needs. And with so many of the company's products satisfying USGBC, NAHB and ENERGY STAR ventilation requirements for green building, you can be confident that choosing these products is a smart step toward creating a healthier home, saving energy and saving money.

More than 150 million Broan and NuTone fans are installed across the U.S., not only establishing the company as America's choice for residential ventilation, but reconfirming its leadership role in the industry. To learn more, visit www.Broan.com and www.NuTone.com.
