## Inexpensive Ways To Bring Spring Into Your Home

(NAPSA)—Spring is a time of new beginnings. Flowers and plants are blooming, the sun is shining and the weather is finally getting warmer after winter's chill. So why not bring some of spring's beauty into your home? Here are some easy, affordable project ideas from the decorating experts at Rust-Oleum to help you bring spring inside:

### Bring Your Flower Garden Indoors

A great way to perk up a home for spring is by decorating rooms where you spend the most time—like the living room, family room or kitchen—with flowers. By spray painting flowerpots you already own bright yellow, purple or green and grouping them into indoor “gardens,” you will give them new life while bringing the great outdoors inside. Consider using Painter's Touch Ultra Cover 2X, a fast-drying spray paint that works well on wood, wicker, metal, plaster and unglazed ceramic and resists chipping and fading.

### Winds Of Change

Adding color to a ceiling or oscillating fan is a great way to add a pop of color in an unexpected way. Find a good deal on a fan that complements your personality at a flea market or discount store and bring it home for a facelift. Covering the fan in just one coat of inexpensive spray paint in a fresh spring color will create a conversation piece that will last throughout the year. For this project, try using Rust-Oleum Universal spray paint. Its unique trigger spray makes it easy

**Let the flowers bloom inside your home in brightly painted pots.**

to use at any angle and it can be used on any surface—plastic, metal, wood and more.

### Bring Patio Furniture Inside

Remember the old wicker chair and love seat you picked up at Aunt Ida's garage sale? They're not just for outside! Spray paint them with one coat of Painter's Touch Ultra Cover 2X in a bright spring color such as Aqua or Green Apple and suddenly you have new seating that is perfect for your sunroom, front porch or foyer.

### Renew Flea Market Finds

Save that dingy chandelier, tarnished lamp or outdated bookcase from the trash by restoring it with Rust-Oleum. A fresh coat of spray paint is sometimes all that is needed to turn garage sale or flea market finds into treasures.
