

Join Kids To Save Energy

(NAPSA)—A key way to save money is to save energy at home. To help, youngsters are showing their communities how to make energy-efficient changes.

The U.S. Environmental Protection Agency (EPA) ENERGY STAR program and Boys & Girls Clubs of America educate and activate their neighbors to be more energy efficient at home. Simple steps such as changing to ENERGY STAR-qualified lights or sealing air leaks around doors and windows can save energy. They also save money and reduce green-

With your help, America's youth can save money, save energy and help fight global warming.

house gas emissions, which helps fight global warming.

You don't have to be a kid to spread the word about energy efficiency. Talk to your family and friends about it. Take the EPA's Change the World, Start with ENERGY STAR Pledge and commit to reducing your energy use. If every American household took part in the pledge, we would save more than \$18 billion in annual energy costs and prevent greenhouse gases equivalent to the emissions of more than 18 million cars. Visit www.energystar.gov/changetheworld for ideas and information.
