

## Light The Way To Security

(NAPSA)—Returning from work, errands or vacation to find your home burglarized would be devastating. You'd lose more than money; you'd lose your sense of security. This summer, protect your property and your well-being with the following tips:

**Lock It Up Like Fort Knox.** Check that every window and door lock is tight and in working order.

**Heath-Zenith introduces the industry's first 360-degree decorative motion light to protect your property.**

---

**Enlist Nature's Most Beautiful Barbwire.** Bushes and flowers around your home are stylish during the day, but can also act as security guards at night. Use rose bushes or other thorny plants along the exterior walls directly under windows.

**Shed Light On Dangers.** Light up dark areas, including all entry points—doors and windows—and remote areas like garden sheds and walkways, with security motion lights. New decorative fixtures from Heath-Zenith are an attractive security option if you want award-winning security features while also protecting the look of your home. These lights are available in many finishes and designs at Lowe's.
