

# MANAGING YOUR MONEY

## Making Money Transactions On The Go

(NAPSA)—If you're wondering how much money you have, you may want to check your pocket. That's a good place to keep a Web- or text message-enabled mobile device that allows you to access your bank funds.

With such mobile devices it's possible to act quickly, no matter where you are, and make sure you have enough money in an account or even transfer money between accounts.

Wells Fargo Mobile<sup>SM</sup> service is available to all of its online banking customers nationwide. With both browser and text messaging options, the service has been a big hit with everyone from college students to small-business owners.

Once enrolled in the company's mobile service, customers can:

- Check balances. Small businesses can check balances of their deposit and credit accounts. Individual customers can view checking and savings accounts, mortgage, home equity, brokerage, auto loan, student loan and credit card accounts;

- View transaction history;
- Transfer money with the browser service between eligible accounts.

Mobile banking has many practical uses. For example:

- Shoppers can check their account balance in the checkout aisle;

- Travelers can check their account balance on the spot rather than through online banking from their hotel rooms;

- College students can ease the anxiety of being away from home by monitoring how much money they have in their accounts.

Mobile banking is helpful for

**Mobile devices let users check account balances, view transaction histories and transfer money between accounts.**

anyone who can benefit from the convenience of checking his or her account balances or making money transfers easily and quickly while on the go.

For the browser-based mobile banking option, software determines the specifications of the handheld device accessing the service, giving each customer the best possible experience for the hardware he or she is using. With text banking, customers simply send a shortcut command to WELLS (93577) to quickly receive information.

Customers can also choose to receive e-mail alerts on their phones with information about their accounts, payments or even low balances.

Wells Fargo's Online Security Guarantee provides added protection against unauthorized access to customers' accounts when using the Wells Fargo Mobile service.
