

HINTS FOR HOMEMAKERS

Multi-Purpose Cleaners Clean—And Save

(NAPSA)—Do you really need a different cleaning product for every household chore? People may disagree, but one thing is certain: With supermarket shelves lined with hundreds of specialty products for cleaning sinks, tubs, tile and glass surfaces, stocking your home with cleaners can be both confusing and expensive.

Multi-purpose cleaners safely clean a variety of surfaces.

The easiest and most cost-effective way to clean the home? Try a multi-purpose cleaner, experts say.

Such cleaners have the advantage of effectively cleaning a variety of surfaces. A good example: Breath O' Pine, from Brondow Inc., which—for those who love statistics—has been used more than eight billion times since being introduced in the 1940s to disinfect, deodorize and provide heavy duty cleaning everywhere from kitchens to laundry to the garbage can and even on pet areas.

More than 75 million bottles of this pine oil-based cleaner have been sold to date. To learn more, visit www.breathopine.com.
