

Night And Day Skin Care

(NAPSA)—Skin conditions such as wrinkles, dullness, lack of firmness, hyperpigmentation, irritation, sensitivity and rough surface texture can be treated around the clock with a pair of powerful treatments.

Leading skin care experts have come up with ways to protect your complexion by day and repair it by night.

Called Powerful-Strength Line-Reducing Concentrate and made by the chemists at Kiehl's Since 1851, the daytime treatment offers a continuous delivery of potent vitamin C concentrate in a safe and efficacious formulation to improve "marionette lines" around the mouth, crow's-feet and wrinkles in the eye area, other lines and wrinkles, skin texture and tone, and protects skin from such daily stressors as UV rays and air pollution.

At night, skin needs to regenerate, repair and replenish what was lost all day. Kiehl's chemists developed Midnight Recovery Concentrate, a 99 percent naturally derived blend of active botanicals and essential oils that repairs and regenerates skin when it best absorbs active ingredients, typically midnight to 4 a.m. At night, this can be used over Powerful-Strength Line-Reducing Concentrate.

For more on these anti-aging formulations, visit www.kiehls.com. Find Kiehl's at Kiehl's Since 1851 retail stores, (800) KIEHLS-2 and select specialty retailers.
