

HINTS FOR HOMEOWNERS

Polish Up Your Routine

(NAPSA)—You can clean up on the best ways to keep your home sparkling.

When shopping for cleansers, home experts recommend you look for gentle formulas with nonabrasive ingredients to help prevent scratching. All-in-one cleansers and polishers can help make routine cleaning easier and faster.

If you're trying to cut your cleaning time, consider all-in-one cleansers and polishers.

A few products stand out. Stainless Steel Magic is an all-in-one, nonabrasive cleaner and polish for stainless steel and chrome. Its virtually streak-free formula helps repel water and reduce fingerprinting on sinks, oven tops, range hoods and appliances.

Another product, Goo Gone, is known for its ability to remove crayon, gum, scuff marks, grease and makeup. The citrus-based product also works on oil, soap scum, shoe polish, asphalt, sticky price tags and adhesives. For more information, visit www.magicamerican.com.
