

# INGENIOUS IDEAS

## Power Window Coverings

(NAPSA)—You've seen motorized window coverings in commercial spaces and luxury homes. Now you can easily add this convenience to your own home—controlling light, views and privacy at the push of a button.

**A remote control that tilts blinds open and closed adds convenience to these stylish aluminum blinds from Hunter Douglas.**

Hunter Douglas Window Fashions recently introduced PowerTilt™, a battery-operated remote control motorization system that tilts blinds open or closed. The system is:

- **Convenient**—It allows slats to tilt fully in both directions smoothly and efficiently. One control can operate up to three blinds individually from as far away as 50 feet. The system can also be retrofit into existing blinds in a matter of minutes.

- **Affordable**—The system's simple installation and battery-powered function eliminate the need to hire electricians or contractors.

- **Stylish**—PowerTilt is available on select higher-end Hunter Douglas Alternative Wood Blinds and Shapes and Country Woods® product lines as well as on the new Modern Precious Metals™ aluminum blind collection.
