

Protecting Our Environment

Tips For Keeping America Beautiful And Preserving Our Natural Resources

by *Virginia Busch*
Anheuser-Busch

Conservation Ambassador

(NAPSA)—Focusing on conservation and preserving our natural resources has always been important to Anheuser-Busch. When it comes to protecting the environment, there are simple, everyday ways we all can make an impact. Below are a few suggestions:

Busch

• Reduce landfill waste by recycling aluminum, glass and paper and buying recycled products whenever possible.

• Set good examples by not littering and picking up trash wherever you go.

• Team up with others in your community to hold an organized clean-up event.

• Conserve water by not letting the water run when you brush your teeth and by taking shorter showers or baths in a

partially-filled tub.

• Reuse materials, such as paper grocery bags, rather than throwing them away.

• Reduce air pollution by using less heat and air conditioning.

• Conserve energy by turning off lights and electronic equipment when you leave a room.

• When you travel, leave wild things in the wild—don't transport wild flowers or plants. Don't buy products made from endangered species.

• Preserve wild habitats in your area by growing native plants, grasses, flowers, shrubs and trees, which are more likely to attract native birds, butterflies and other insects.

• Plant a tree and build a bird-house in your yard.
