

HINTS FOR HOMEOWNERS

Remodeling The Kitchen And Bath

(NAPSA)—The next time you remodel your bathroom or kitchen it can pay to take steps that prevent your money—and time—from going down the drain.

Kitchen and bathroom fixtures with powder coated finishes are more durable and scratch-resistant.

For example, if you are working with a contractor, be sure to get a list of references from people he has worked with in the past. Write letters to the clients, asking if they were satisfied with his work.

Home improvement experts also suggest installing products made specifically to stand up to the hard wear and tear kitchens and baths are exposed to. For instance, homeowners can find numerous types of fixtures and appliances protected with a powder coated finish. This innovative finish is tough against corrosion and protects items against chipping, scratching and moisture deterioration.

In addition, powder coating comes in a rainbow of colors, making it easier for homeowners to make a colorful splash in their kitchens or baths.
