

## Save Children And Pets

(NAPS)—Saving the lives of children and pets during a fire may be as simple as putting a decal on your window.

That's because a bright red fluorescent decal placed on the window by a homeowner may help alert firefighters to the presence of a child or pet.

**Bright decals in windows may help firefighters find children, pets and other loved ones during a fire.**

“Thousands of children and family pets die every year because firefighters don't know that victims are trapped inside,” said Todd Appleman, decal designer and founder of eSafetyAlert.

There are two versions of the CHILD ALERT decals. One is for CHILD INSIDE, the other says SAVE CHILDREN INSIDE. Other versions for pets say PET ALERT, SAVE DOG, SAVE CAT or PETS INSIDE.

Decals for senior citizens and the disabled are also available. The decals are designed to help firefighters find victims, many of whom die from smoke inhalation or burns because they hide under things and are not found in time.

“These decals will inform firefighters and help prevent such tragedies from happening,” said Appleman, who has written stories about fire tragedies as a journalist.

To obtain a set of three decals, send a self-addressed, stamped envelope and \$5 to eSafetyAlert, P.O. Box 69813, Los Angeles, CA 90069. For more information, visit [www.esafetyalert.com](http://www.esafetyalert.com).
