

MANAGING YOUR MONEY \$

Savings Tips

(NAPSA)—Saving money may be easier than you imagine. A few simple tips and tools can help you get the most out of your money:

- When you feel the urge to go shopping, first, clean your closets. Separate clothes into piles to keep, donate, or sell on consignment. You may already have what you think you need. At the very least, you'll have a better idea of what that is. This is especially important if you pay for storage.

You can do more than dream about your next vacation. These simple tips can help you afford the getaway you deserve.

- Don't just buy the first thing you see. Compare prices and be alert to quality. Watch for seasonal sales at reliable shops.

- Before you can cut expenses, you have to track them. A budget book such as the "Dome Simplified Home Budget Book" can help. It offers pages on which you can log expenses, plus helpful information and tips to cut costs.

- Use a shopping list and stick to it. This can reduce costly impulse buying.
