### **Sisters Help Cancer Research**

(NAPSA)—Lois Catrambone's sister Norma died of breast cancer. Now, Lois is joining with thousands of other women to help researchers find the causes of breast cancer through the Sister Study.

**A national study looking at environmental and genetic causes of breast cancer.**

Is breast cancer caused by something women come in contact with at work, at home, in their communities or in the products they use? That's what the National Institute of Environmental Health Sciences, is trying to answer.

You may be eligible for the Sister Study if your sister had breast cancer, but you never had; you are between the ages of 35 to 74; and you live in the United States or Puerto Rico.

To volunteer for the Sister Study, visit [www.sisterstudy.org](http://www.sisterstudy.org) (for Spanish visit [www.estudiodehermanas.org](http://www.estudiodehermanas.org)) or call 1-877-4-SISTER.
