## **Skin Care Vitamins Fight Aging**

(NAPS)—When taking your morning vitamins, don't forget to nourish your skin by applying a vitamin-enriched skin care formula.

One of the best ways to protect skin and reduce the appearance of marionette lines, crow's feet and undereye wrinkles is to use a skin care formula that contains an effective form of vitamin C.

**To help reduce the appearance of wrinkles, apply a skin care formula packed with vitamin C every day.**

For example, the Powerful-Strength Line-Reducing Concentrate from Kiehl's Since 1851 has been clinically proven to reduce the appearance of wrinkles and fine lines while improving skin texture and radiance. This potent treatment is formulated with a high concentration of 10.5 percent pure vitamin C (L-ascorbic acid), known for its ability to improve the appearance of skin aging.

A high dosage of vitamin C, when applied topically, has been shown to have a multitude of positive effects on the skin's appearance. Kiehl's chemists found a way to formulate and stabilize pure vitamin C at high levels in a safe and effective form to maximize its treatment benefits.
