The Fashion Of Function

(NAPSA)—This season, look for some of the hottest fashion trends to start from the ground up. Style watchers say shoes will be all the news in the fashion world, with new types of footwear adding both form and function to the trendiest outfits.

Stay Cool—Breathable, lightweight clogs are hot this season.

For instance, people will be pairing different types of comfortable clogs with warm weather outfits for a look and feel that's completely cool. Quark makes a clog called the Liberty that has a swivelling backstrap, unisex styling and a breathable design. Weighing in at just 3.6 oz, it's one of the lightest shoes you can find.

The company has an entire line of ultralightweight shoes that offer long-wear comfort. Many styles are designed with a moisture-management system to provide a cool and comfortable wear. They're available in an array of colors and styles—from all-weather to professional—and can help complete your warm weather fashion look.
