

# HOLIDAY GIFT IDEAS

## The Ultimate Showerhead?

(NAPSA)—Making a splash with many holiday gift givers is what some have called the world's finest showerhead.

Once found only at the finest resorts and health spas, this showerhead could be just the wake-up call you—or someone on your holiday list—have been waiting for. Most people never get the opportunity to experience the pleasure of a full flow shower; it's like standing under a warm waterfall and being flooded with relaxing currents of stimulation. With the right showerhead, however, in just a few minutes each morning, you can get a fresh start and a great attitude that may last all day long.

It's the kind of feeling some say you'll get only from the showerhead that's considered the standard of the industry—the Anystream® line of showerheads produced by the Speakman Company. They have received national recognition and numerous awards, including the *Consumers Digest* "Best Buy" in 1994, 1997 and 2000. *Forbes Magazine* listed the Anystream Showerhead 24th on its "List of 100 Things Worth Every Penny."

What makes the Speakman Anystream showerheads so different is the spray plunger system in the faceplate. These plungers move in and out to adjust the water flow from full flood to needle jet sprays. The simplicity of the large side handle allows for

**Treat yourself: A quality showerhead may help you greet each day with a smile.**

ease of adjustment you won't find in any other shower. A design that goes back 75 years, the side handle adjustment and plunger system still outperforms all other products, whether domestic or imported.

Made from solid brass, these showerheads are built to last a lifetime. That's why they're still in use today in some of the most recognizable buildings in the world, including the White House! Small wonder that many homeowners take their Anystream showerheads with them when they move to a new home.

These showerheads are now available at many home improvement and other retail centers throughout the U.S. To find out more, call the Speakman Company at 1-800-537-2107; or visit [www.speakmancompany.com](http://www.speakmancompany.com) to find a location near you.
