

# Tips On Trips

## Travel To Your Own Tune

(NAPSA)—Traveling with music used to mean adding the extra weight of CDs or cassettes to your load. Today, MP3 players offer a compact, lightweight way to store and listen to your songs.

To get the most out of your tunes and video on the road, consider the following travel accessories:

**MP3 players make it easy to travel with a song in your heart (and in your headphones).**

- **Noise Cancellation Headphones**—After spending a lot on tickets, it's important to enjoy the travel. Maxell's affordable headphones let you listen to music without the interference of background noise.

- **Portable Travel Speakers**—Small and light, but packing a powerful sound; can be folded for easy storage.

- **Remote Control**—Control music from across the room or just the seat next to you.

- **7-in-1 International Power Plug** —Never miss a beat when traveling abroad. Includes five plugs.

- **Protective Skins and Cases**—With all the traveling around, it's smart to protect your player from bumps and bruises.
