Wondrous Looks

(NAPSA)—Even in the chillier months, wearing the right undergarments is essential in achieving a great look. Smooth, seamless lines and the right amount of support lend a hand to this season's sleek and sexy silhouettes. By accompanying warm winter looks with smart lingerie style, piling on clothes has never been sexier. Some styles can add flair to a woman's attire and attitude.

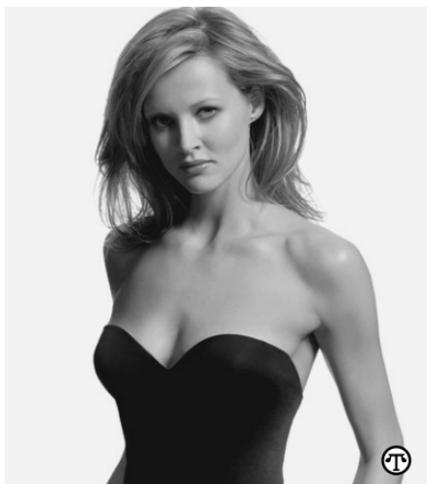

"We tend to forget the importance of lingerie sometimes. Consider lingerie an accessory to completing your perfect outfit, like an evening bag or rose pin," says Kathy Linehan, Director of Merchandising for Wonderbra. "And this is particularly true in the winter! Even though we're covered in warm clothes, what's underneath is just as important as what is on top. Wonderbra has styles that can suit any occasion, mood or personality for all women."

What's the buzz in fashion this season?

- Black is here to stay. The color of almost every season returns along with plums and deep purples. These colors are jumping into everything and anything—from your favorite wool sweater to dresses and outerwear. When wearing winter wools, maintaining the smooth line underneath is crucial, so try a Seamless Push-Up bra to give you that seamless look and cleavage.

- You've got the look this season if you're wearing babydoll dresses or romantic ruffles. Corsets are in as well, and if you're looking for a corset-like bra, you can try a Specialty bra by Wonderbra: the sleek, seamless Backless Bustier gives a sexy look under jackets, or the Stretch Foam Strapless bra provides a dramatic look under a lacy top.

- These boots were made for walking this winter...especially if

Lingerie is an accessory that completes any outfit for any season.

they are lace-up boots, ankle or calf high boots. Heels are in too, the higher the better.

- Cold weather calls for hot accessories: big bags, belts in both wide and narrow widths, legwear in fishnets and bold graphics. Gloves (long and elegant) and little pins are also must-haves. For an added treat, get yourself the newest trend, a "scarm"—a scarf with arms.

- Leather and fur are on the prowl. Seen on every runway, gracing capes and sweaters, pants and skirts—leather and fur are everywhere. Fake or genuine, wear it proudly. When wearing your leather pants with a matching top, lines are a no-no, so look for a lightly lined seamless bra with a matching thong such as the new Wonderbra® Wraapture styles.

Whatever look you choose, Wonderbra can help with any style from a collection of lightly lined bras, slightly padded bras, or ultimate-in-cleavage bras. You choose the one to match your personality, mood or attitude. For winter, what's underneath is just as important as what's on top.
