YOUR HEALTHY HOME

PEOPLE ARE INCREASINGLY CONCERNED ABOUT DIRT AND GERMS THESE PANDEMIC DAYS, BUT MANY ARE NEGLECTING A SPOT WHERE AIRBORNE CONTAMINANTS CAN LURK: THE AIR DUCTS. EVEN IN THE CLEANEST HOUSE, THE INDOOR AIR SYSTEM CAN RECIRCULATE CONTAMINANTS. THIS CAN BE A PROBLEM FOR CHILDREN, SENIORS AND THOSE WITH RESPIRATORY OR AUTOIMMUNE CONDITIONS—AND MEAN HIGHER ENERGY BILLS. FORTUNATELY, A REPUTABLE, CERTIFIED H-V-A-C PROFESSIONAL CAN HELP. TO FIND ONE, VISIT THE NATIONAL AIR DUCT CLEANERS ASSOCIATION AT N-A-D-C-A--DOT--COM.
