

Technology Improving Lives

Game-Changing Connectivity

(NAPS)—Technology is essential for any small business, whether a landscaper, retail establishment, consulting firm or just about anything else. Below are five technologies to strengthen and support your business.

Five Types of Tech to Try:

1. BUSINESS INTERNET: Internet services bring the power of ultra-reliable, secure, gigabit-ready connectivity directly to your doorstep—or anywhere you do business. Great connections are an everyday thing.

For help doing business like nobody's business, local cable companies can provide the connectivity you need.

2. BUSINESS VOICE: Stay connected with customers, employees, vendors, business partners—everyone. From single-line solutions to high-capacity trunks, you can connect with the right voice-and-messaging solutions necessary to maintain and grow your business.

3. BUSINESS VIDEO: Captivate customers by providing on-screen entertainment wherever they want it: in hotel rooms, in customer waiting areas, in restaurants and bars, in bank lobbies, anywhere people gather.

4. BUSINESS NETWORK: Secure multi-location networks to dedicated fiber links, the spot-on solution for any size business or growing enterprises. Experience a private fast lane for secure connectivity, backed by expert support and guaranteed uptime. Delight your customers with WiFi that's convenient, easy to identify and always easy to use.

5. LOCAL SUPPORT: Reliable and local support readily available when needed. Equipped with a dedicated IT partner, local cable support allows you to focus on managing your business and taking care of your customers.

When you power your business with a local cable connectivity provider, you can rely on dependable, affordable and secure communications. Learn more about what cable has to offer and how to connect with a provider by visiting, www.businessservicesconnect.com.
